

YOU CHECK YOUR PATIENT'S COLON AND IF THERE'S A POLYP ● IT'S REMOVED BEFORE IT TURNS INTO CANCER.

You know how to prevent colon cancer. Make sure your patients do too.

Colorectal cancer screening may not be the easiest topic to discuss with patients, but the fact that colorectal cancer can be prevented is something that they really need to hear. Unless you start the conversation, chances are, they won't bring it up. For some helpful resources, call 1-800-ACS-2345 or visit www.cancer.org/colonmd.
