Diet and Activity Guidelines to Reduce Cancer Risk

Staying at a healthy weight, being physically active throughout life, following a healthy eating pattern, and avoiding or limiting alcohol may greatly reduce your risk of developing or dying from cancer.

EXCESS BODY WEIGHT, POOR NUTRITION, PHYSICAL INACTIVITY, AND EXCESS ALCOHOL CONSUMPTION

EXCESS BODY WEIGHT, POOR NUTRITION, PHYSICAL INACTIVITY, AND EXCESS ALCOHOL CONSUMPTION = ABOUT 1 IN 5 CANCER CASES

OVERWEIGHT OR OBESITY RAISES A PERSON’S RISK OF GETTING ONE OR MORE OF

OVERWEIGHT OR OBESITY RAISES A PERSON’S RISK OF GETTING ONE OR MORE OF 13 TYPES OF CANCER

The American Cancer Society Diet and Physical Activity Guidelines for Cancer Prevention provide recommendations for weight control, physical activity, diet, and alcohol consumption to reduce cancer risk.

The American Cancer Society recommends the following:

GET TO AND STAY AT A HEALTHY BODY WEIGHT THROUGHOUT LIFE.

BE PHYSICALLY ACTIVE.

EXERCISE
ADULTS should get 150-300 minutes moderate-intensity activity/week or 75-150 Minutes vigorous-intensity activity/week or a combination of the two through the week

CHILDREN AND TEENS should get at least 1 hour of moderate- or vigorous-intensity activity each day.

LIMIT SEDENTARY BEHAVIOR
• Screen-based entertainment
• Sitting around
• Lying down
Many environments – where people live, learn, work, shop and play – are not supportive of making healthy choices.

The American Cancer Society recommends that public, private, and community organizations work together to increase access to affordable, healthy foods and provide safe, enjoyable and accessible opportunities for physical activity.

**YOU CAN MAKE YOUR COMMUNITY HEALTHIER BY:**

- Asking for healthier meal and snack choices at school or work
- Speaking up at city council and other community meetings about the need for sidewalks, bike lanes, parks, and playgrounds to help make easier to walk, bike, and enjoy a variety of physical activities
- Supporting stores and restaurants that sell or serve healthy options

---

**MORE FRUITS AND VEGGIES … LESS JUNK**

- Foods high in vitamins, minerals, and other nutrients in amounts that help you get to and stay at a healthy body weight
- A colorful variety of vegetables – dark green, red, and orange
- Fiber-rich beans and peas
- A colorful variety of whole fruits
- Whole grains, like whole wheat bread and brown rice

**IT IS BEST NOT TO DRINK ALCOHOL**

- Red meats such as beef, pork, and lamb and processed meats such as bacon, sausage, deli meats, and hot dogs
- Sugar-sweetened beverages
- Highly processed foods and refined grain products

- If you do choose to drink alcohol, women should have no more than one drink per day and men should have no more than two drinks per day.
- A drink is 12 ounces of regular beer, 5 ounces of wine, or 1.5 ounces of 80-proof distilled spirits.
