Estimates are rounded to the nearest 10; cases exclude basal cell and squamous cell skin cancers and in situ carcinoma except urinary bladder. About 59,080 cases of female breast ductal carcinoma in situ and 107,240 cases of melanoma in situ will be diagnosed in 2025. These are model-based estimates and should be interpreted with caution. ^aDeaths for colon and rectal cancers are combined because a large number of deaths from rectal cancer are misclassified as colon. ^bMore deaths than cases may reflect a lack of specificity in recording the underlying cause of death on death certificates and/or an undercount in the case estimate.
